Screen Sculpture

Arts For Urban Development

About Vinentaa

Over the past 12 years, Vinentaa has evolved from a small sculpture company to a service company that offers a comprehensive range of art services and products. We are dedicated to the study and application of art to urban development. By working with hundreds of artists and architects from all over the world, we keep abreast of artistic trends and lead the way in the use of art in various areas of urban development.

We have undertaken 600+ art sculpture projects from all over the world, some from art galleries, artists, architects, national governments and large corporations, gaining a great deal of experience in production and art project management. At Vinentaa, you can see almost every sculpture production process and material available worldwide.

Vinentaa is committed to providing a one-stop artistic service for your project, including artistic consultancy, budget control, project management, original sculpture design, sculpture deepening, sculpture prototyping, sculpture fabrication, global shipping and installation.
